Relevant Work Experience

- Senior Engineer, NFI Industries
March 2020 - Present, Camden, NJ
 - Lead NFI's Digital Twin team, creating new modeling infrastructure and shipping data-driven features to production transportation management systems.
 - Improve engineering productivity 10x through continuous integration (CI), new databases and redesigns, new or improved ETL, custom infrastructure tooling, and automation projects.
 - Expanded engineering team to manage emerging development and consulting initiatives by partnering with executive leadership.
 - Lead efforts to establish a new internal integration of a GitHub Org, Metabase, and a Slack workspace to improve user-to-developer feedback and general productivity during COVID-19.
 - Engineer, NFI Industries
May 2017- March 2020, Voorhees, NJ
 - Developed an internal pricing tool web application for R&D to launch pricing tools research.
 - Developed genetic algorithms for driver scheduling and transportation modeling to fill software gaps.
 - Developed cross-dock simulations for customers' wishlist consulting engagements.
 - Developed large-scale supply chain models including but not limited to transportation optimization, network optimization, simulation, and inventory strategy.
-

Skills

- Python, SQL Server (MSSQL/TSQL)
 - Git, GitHub, VSCode, GCP, Digital Ocean, Vagrant, Metabase
 - Involved in open source since 2015
github.com/cnpryer
-

Side Projects

- Next.js and Electron apps (goal: learn TypeScript, React, D3.js, Docker, cross-platform desktop apps, distributed architecture and microservices)
 - Decentralized app Solana (goal: learn about Solana, protocol, and smart contract development)
 - Discord bots (goal: learn Go and unique asynchronous apps)
 - Parsing libraries (goal: learn Rust and broaden lower-level implementation skills)
 - Tooling for flat file consolidation (goal: create niche open-source project using Python packaging skills)
 - Self-education content
-

Education

- Management Information Systems - B.S., Rowan University
 - Served as Rowan's Web Development Committee lead for the ACM Club from 2016-2017.
 - College credits and self-studies for Computer Science and Mathematics.
